

# EXPLORING FOR HIGH-GRADE GOLD IN CANADA

TSX | NYSE-A: FURY

## Investor Presentation

August 2025

## Cautionary Notes

This corporate presentation is intended to provide readers with an overview of Fury Gold Mines Limited (the “Company”). The Company has made reasonable efforts to ensure that the information contained in this presentation is current as of August 20, 2025, however, it is not a prospectus and does not necessarily contain all the information needed to make an investment decision about the Company. As discussed below, this presentation includes a number of estimates and assumptions that are inherently subject to significant exploration, business, economic, regulatory and competitive uncertainties and risks.

## Forward-Looking Information

This presentation includes many statements that are “forward-looking” in nature within the meaning of applicable securities laws. These statements relate to many things about the future activities of the Company and factors affecting it. Generally, statements that are not historical facts will likely be forward-looking to some degree, and will use terminology such as “plans”, “expects”, “budget”, “scheduled”, “estimates”, “forecasts”, “intends”, “anticipates”, or “believes”. Forward-looking information and statements in this presentation reflect management's current estimates or expectations regarding these future events and challenges. More specifically, forward-looking information contained in this presentation includes information relating to the outlook for the Company's mineral properties, their exploration potential, and the likely costs of further, exploration and the Company's growth plans. There can be no certainty that such statements will prove to be accurate, and actual results and future events could differ materially from those suggested by such statements. Assumptions, which underlie the forward-looking statements include the Company's ability to raise additional capital to continue with its exploration, and if warranted development plans, its ability to obtain or renew the licenses and permits necessary for its current and future operations; and the Company's assumptions around the impact of the COVID-19 pandemic, the future price of minerals, especially gold; and the success of the Company's exploration activities. Readers should refer to the risks discussed in the Company's Annual Information Form and MD&A for the year ended December 31, 2024 and subsequent continuous disclosure filings with the Canadian Securities Administrators available at [www.sedarplus.ca](http://www.sedarplus.ca) and the Company's Base Shelf Prospectus dated October 12, 2023. The Company's Annual Report on Form 40-F for the year ended December 31, 2023, filed with the United States Securities and Exchange Commission (the “SEC”) available at [www.sec.gov](http://www.sec.gov). Readers should not place heavy reliance on forward-looking statements, which can speak only as of the date made.

## Mineral Resource Terminology

This presentation may use “mineral resource”, “measured mineral resource”, “indicated mineral resource” and “inferred mineral resource”, which are Canadian mineral project disclosure terms as defined in National Instrument 43-101 - Standards of Disclosure for Mineral Projects (“NI 43-101”). NI 43-101 references the guidelines set out in the Canadian Institute of Mining (“CIM”), Metallurgy and Petroleum – Definition Standards on Mineral Resources and Mineral Reserves.

## United States Mineral Terminology

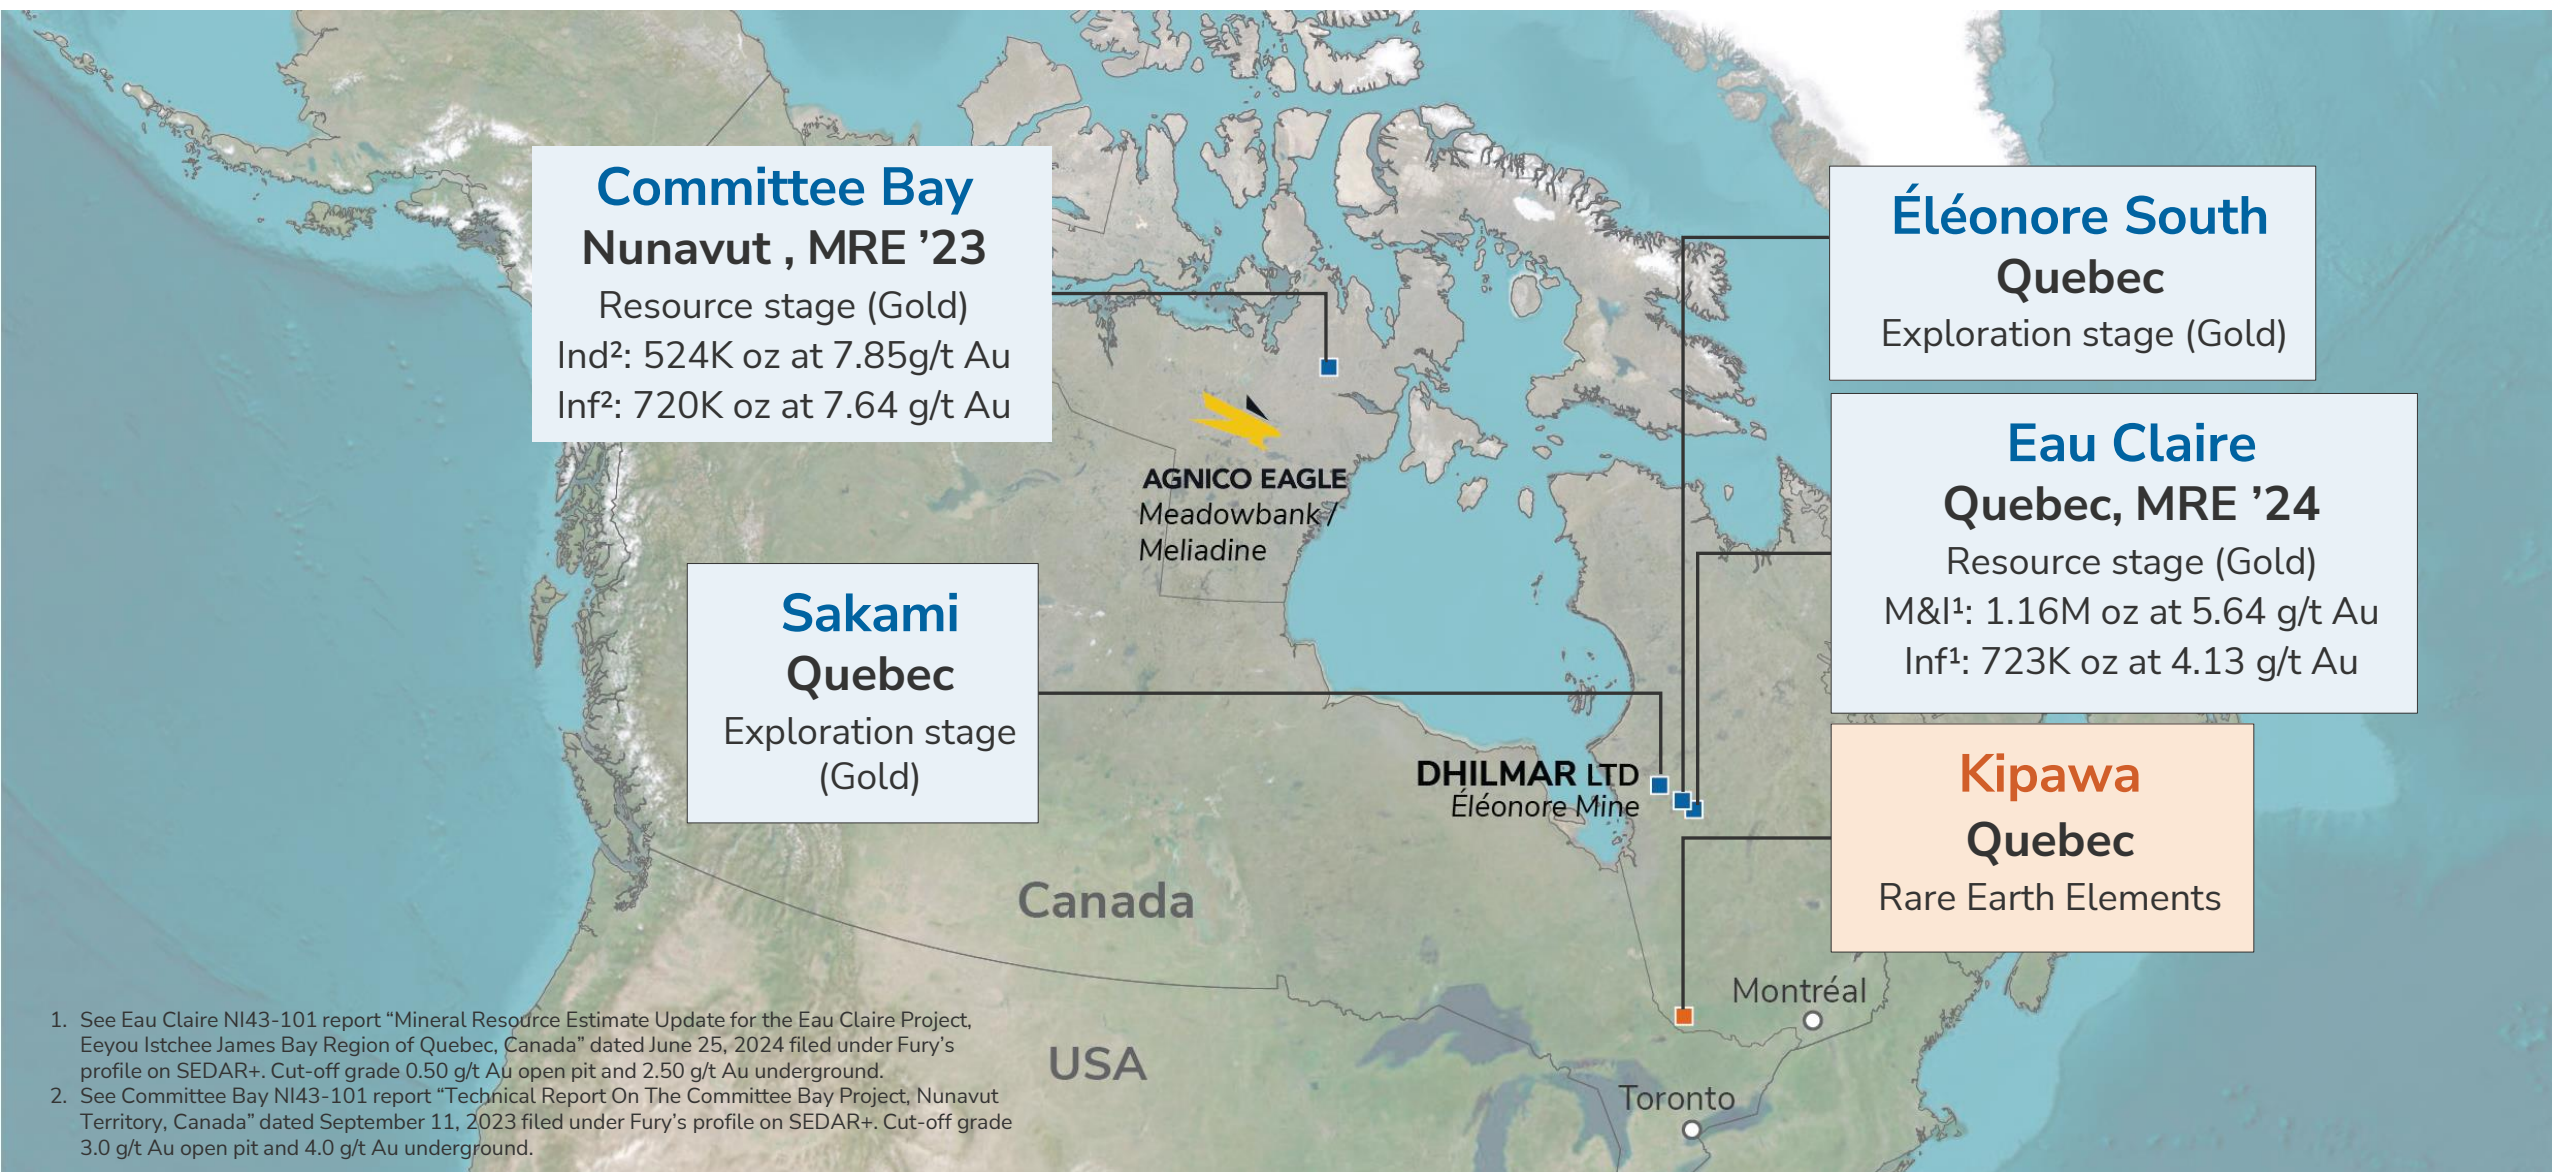

CIM terms are not considered defined terms under the SEC's mining rules. The SEC has recently adopted amendments to its disclosure rules to modernize the mineral property disclosure requirements for issuers whose securities are registered with the SEC under the United States Securities Exchange Act of 1934, as amended. (the “SEC Modernization Rules”). United States investors are cautioned that there are differences in the definitions under the SEC Modernization Rules and the CIM Definition Standards.

## Technical and Scientific Information

The scientific and technical information included herein has been largely derived from the following technical reports prepared in accordance with NI 43-101: (a) the technical report entitled “Mineral Resource Estimate Update for the Eau Claire Project, Eeyou Istchee James Bay Region of Quebec, Canada” dated June 25, 2024, and (b) “Technical Report On The Committee Bay Project, Nunavut Territory, Canada” dated Amended and Restated as of September 11, 2023, with an effective date of October 12, 2023, each of which has been filed with Canadian securities regulatory authorities on SEDAR + (and is available at [www.sedarplus.ca](http://www.sedarplus.ca)) and with the Securities and Exchange Commission on EDGAR (and is available at [www.sec.gov](http://www.sec.gov)).

All disclosure in this presentation of a scientific or technical nature with respect to the Eau Claire Project, based on information arising since the date of the applicable technical report, was reviewed and approved by Valerie Doyon, P.Geo, Senior Project Geologist of the Company, who is a “qualified person” for the purposes of NI 43-101. She has reviewed and approved the technical disclosures in this presentation in relation to all Quebec projects. Bryan Atkinson, P.Geol., SVP of Exploration at Fury, is also a “qualified person” within the meaning of National Instrument 43-101 and has reviewed and approved the technical disclosure in this presentation in relation to the Committee Bay Project. As officers of the Company, Ms. Doyon and Mr. Atkinson are not “independent” qualified persons.

# Committee Bay – Several Drill Ready Targets

## 300 km Long Prospective Greenstone Belt in Nunavut

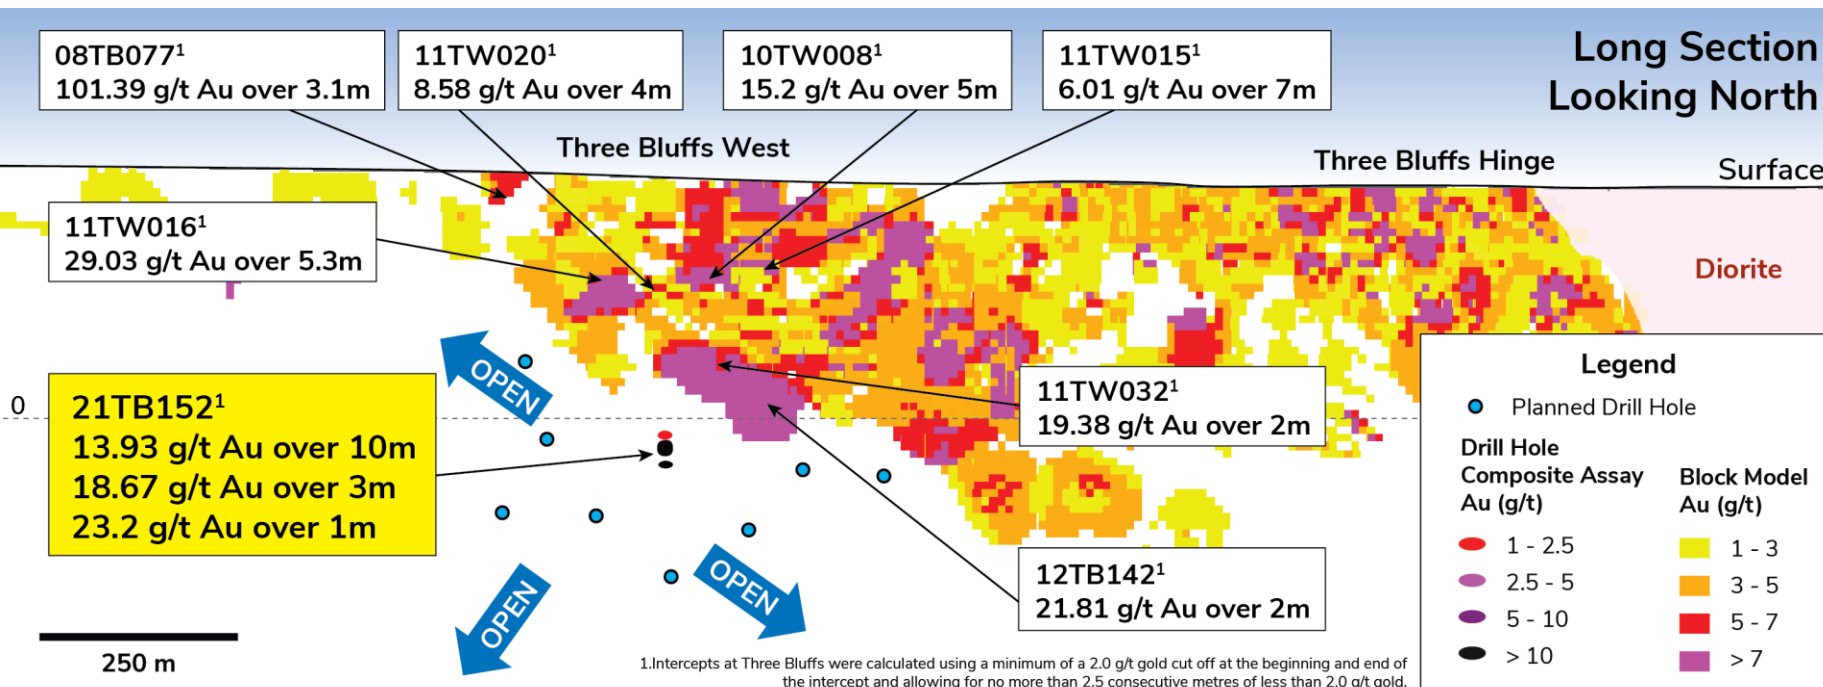

- ▶ 100% ownership of a 300 km greenstone belt (over 238,000 ha.)
- ▶ Existing indicated and inferred resource estimate
- ▶ Significant resource expansion potential for large discovery
- ▶ Belt-wide systematic geochemical and geophysical surveys completed

# Committee Bay – Three Bluffs Deposit

## Exploration Drilling Demonstrates Resource Expansion Potential

### Three Bluffs Deposit

- Indicated<sup>1</sup>: 524k oz at 7.85 g/t Au
- Inferred<sup>1</sup>: 720k oz at 7.64 g/t Au

1. See Committee Bay NI43-101 report "Technical Report On The Committee Bay Project, Nunavut Territory, Canada" dated September 11, 2023 filed under Fury's profile on SEDAR+. Cut-off grade 3.0 g/t Au open pit and 4.0 g/t Au underground.

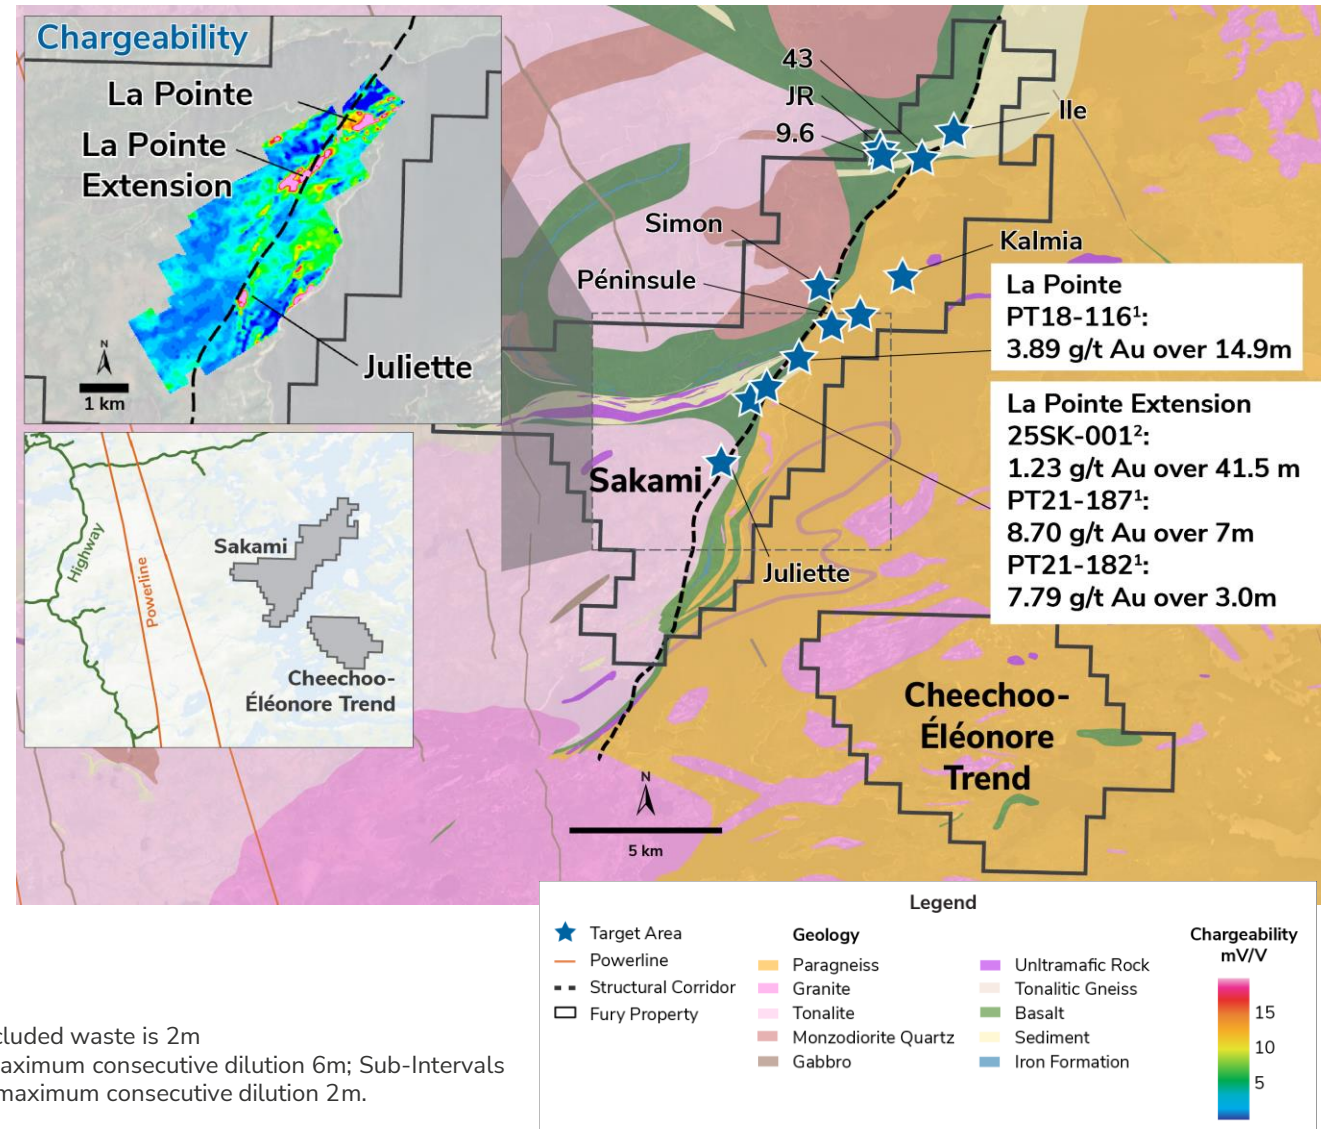

### 2025 Exploration Drilling Program Details:

- 7-10 diamond drill holes totaling approximately 5,000 m
- Focused on expansion of Three Bluffs Shear Zone target, and testing regional shear zones at Raven and Burro West

# Sakami Project

## Large-Scale Gold Potential in a Proven District

- ▲ Road Accessible along edge of Hydro Quebec reservoir
- ▲ La Pointe Extension discovered in 2020
- ▲ Mineralization is focused along and proximal to large regional shear zones
- ▲ Known gold zones remain open for expansion with potential for new discoveries
- ▲ Summer 2025 Drill Campaign:
  - Approximately 3,000 – 5,000 m
  - Focused on discovery at the Juliette target, confirmation drilling at La Point and La Pointe Extension, and stepout drilling at La Point Extension
  - First drill hole intercepted 41.5 m at 1.23 g/t gold

1. Intervals - Au grade\*thickness no less than 2 g/t\*m withgrade is no less than 1 g/t, maximum included waste is 2m

2. Main intervals - Au grade\*thickness no less than 0.25g/t\*m with grade is no less than 0.25g/t, maximum consecutive dilution 6m; Sub-Intervals were calculated using Au grade\*thickness no less than 2.0g/t\*m with grade no less than 1.0g/t, maximum consecutive dilution 2m.

# Near-Term Catalysts

- ▲ Summer 2025 exploration program underway at Sakami
  - Up to 5,000m planned
- ▲ Summer 2025 exploration program underway at Committee Bay
  - Up to 5,000m planned
- ▲ Continuous evaluation of Eau Claire resource potential
- ▲ Forming evaluation committee for Kipawa rare earth project.

# Eau Claire Deposit

## Resource is Open in All Directions

- ▶ Eau Claire vein geometry steepened in areas with new data and interpretation.
- ▶ Since acquiring Eau Claire in 2020, Fury has almost doubled the ounces per metre drilled – **adding 7.38 ounces of gold for every meter drilled** compared to 4.04oz/m drilled historically on the project

# Percival Deposit – Maiden Mineral Resource Estimate 2024

## Significant Potential for Discovery

- ▶ Percival is one of 15+ anomalies along the Percival – Serendipity trend.
- ▶ Linked by existing road infrastructure to the Eau Claire deposit and behaves similarly to Eau Claire mineralization metallurgically
